

RISK MANAGEMENT (For ARMs)

IBF Standards – Wealth Management

4 IBF-STs TRAINING HOURS

This 4-hour course provides a comprehensive understanding of the generic enterprise risk management practices and risk concepts commonly deployed in the financial industry to enhance the overall enterprise risk management. The complexity of today's interconnected financial markets and globalization is exposing organizations to numerous operational, technological and business threats that could lead to substantial data and financial losses as well as reputational damages.

Designed for private banking professionals managing or supporting risk-taking activities for business growth and performances, this programme focuses on the practical considerations in the design, adoption and implementation of systems and processes for optimal enterprise risk and GRC management, aligned to MAS and global regulations. It covers the key enterprise risk management concepts and best practice implementation approaches, including its management and applications to IT and cyber risks. It will also go beyond that and address the practical usage of that knowledge; with case studies and examples.

TARGET AUDIENCE

- Assistant Relationship Managers in Private Banking
- Operations functions in Private Banking
- Covered persons under Private Banking Code of Conduct who may be interested

LEARNING OUTCOMES

- Assist with risk planning in consultation with relevant stakeholders
